

# Fame is a unique woollen upholstery fabric with a wearability of 200,000 Martindale, but which is nevertheless extra soft and stretchable.

The fabric is silky smooth thanks to its exclusive fine woollen worsted - a finer wool than generally seen on the contract market, but assured of outstanding durability via new yarn structures and spinning methods.

Fame possesses unique upholstering properties. The fabric stretches 9.5% in both directions. Perfect upholstering is therefore easier with Fame, even on furniture with round and organic forms.

### **Colour range**

There are 60 shades in the colour range, from subtle natural tones to clear signal colours which appeal to both the private and contract markets.

# Luna is closely related to the classic well-known cloth fabric. Luna gains its life and personality through the melange play of colours.

Luna is a felt fabric with deep roots in Gabriel's proud wool tradition, and it tells a story of culture and experience.

At the same time, the felt's simple and discreet character has a central place in today's strongly individual interior design.

#### **Colour range**

The colour range was designed to radiate an atmosphere of poetry, feeling and reminiscences, and includes a graphical range running from grey through brown to golden nuances.

The entire colour range is also attractively represented by intense colours which give the range warmth and energy. And last but not least, added refinement is added to the range with a selected handful of dusted pastels.

Specifications
